

IR9 Campus

Located in a prominent setting in Wales, IR9 Campus will be a flagship destination for venture-building, education, training and collaboration. Spanning just under 3 acres, it is being developed as a dynamic, future-facing environment with flexible buildings and grounds designed to support innovation, learning and meaningful partnerships across Wales.

More than a campus, this will be a place where ideas are built, people are developed and communities connect. As the physical home of IR9 in Wales, the campus will serve entrepreneurs, educators, collaborators and partners looking to create lasting impact in one of the most important growth locations for our vision.
